SELECTED MBA PROJECTS

BOSTON CONSULTING GROUP (BCG)
MBA Consultant – Luxury Education Foundation (LEF) CX Field Immersion (April 2026)

- Evaluated in-store customer journeys across luxury brands, identifying gaps in customer experience and technology integration, and synthesizing insights into recommendations presented to BCG and LEF leadership on personalization and experiential retail

KAISEY – AI CHIEF OF STAFF FOR STUDENTS
Anthropic x CBS x NYU Claude Hackathon – Team of 4 (April 2026)

- Co-built an AI-powered student life manager integrating Claude, Linkup, Google Calendar, and the Oura API to help students manage recruiting, academics, social, and fitness

AI GOVERNANCE IN AI SHOPPING AGENTS – CONSUMER REPORTS (NONPROFIT ORGANIZATION)
Research Project – Digital Marketplaces Apprenticeship, Selective Program (March 2026 - Present)

- Researched trust, transparency, and sponsored AI recommendations in agent-mediated commerce, analyzing how AI-generated product recommendations shape consumer perception and consideration; developed governance insights on disclosure standards

UNFOLLOWAI – AI AUTOMATION TOOL FOR SOCIAL MEDIA
Personal Project - https://anniesweta2340.github.io/instagram-following/ (December 2025 – Present)

- Leveraged Claude Code to build an AI-powered automation tool that analyzes Instagram follower relationships and engagement behavior

EXPERIENCE

ACCENTURE
New York, NY
2022-2025

Management Consultant (November 2022- January 2025)

- Led current-state documentation and maturity assessment for a global treasury operating model at a Fortune 50 technology company, making strategic recommendations that supported $1.2M in projected annual savings
- Developed a business case for AI-driven forecasting at a Fortune 150 foodservice client, projected 15% accuracy improvement, 10% idle cash reduction, and enhanced liquidity planning, influencing product investment decisions
- Advised a Fortune 100 manufacturer on a global technology strategy; led product selection across 16 criteria including AI capabilities, securing executive and cross-functional stakeholder alignment, and winning $2M+ subsequent implementation work
- Partnered with executive and technical teams to execute a large-scale global digital transformation for a Fortune 100 mining company via TMS implementation, enhancing visibility across 75+ accounts and cutting manual effort by 40%
- Built scalable GTM enablement assets for Accenture's Treasury and Risk solutions and supported performance tracking against revenue and pipeline targets, accelerating sales cycles and contributing to 3 new clients and $5M+ pipeline growth

KPMG
New York , NY
2019-2022

Senior Associate (October 2021- November 2022)

- Led a cross-functional team designing a $676M federal relief program strategy, aligning policy, operational goals, and measurable success metrics to secure U.S. Treasury approval
- Conducted a current and target state analysis to address low engagement in an underperforming government program; implemented process enhancements and launched a stakeholder adoption campaign; resulted in a 3x increase in program participation
- Drove a process transformation initiative to bring automation to a premier government client by identifying business requirements, conducting user acceptance testing, and gathering data requirements; this initiative ended up saving the client $3 million a year

Associate (October 2019- October 2021) - *Received highest annual performance rating in 2020 and 2021*

- Increased project profitability by 20% per resource hour by deploying 65 onshore managed service resources and specialized contractors across 9 projects; developed PowerBI dashboards to track performance metrics and report progress to leadership
- Completed an organizational health assessment to assist a manufacturing client in evaluating their current standing with industry standards; identified 10+ performance gaps and proposed solutions projected to improve operational margins by 18%
