EXPERIENCE

BOSTON CONSULTING GROUP (April 2026) New York, NY
Student Consultant – LEF/ BCG CX Field Immersion (April 2026) 2026

- Evaluated in-store customer journeys across two luxury brands, identifying gaps in customer experience and technology integration, and synthesizing insights into 4 key recommendations on how to integrate AI into current processes

REMY COINTREAU New York, NY
Student Product Strategy Consultant (December 2025 – January 2026) 2025 - 2026

- Defined QR-enabled product experience for Louis XIII to engage younger consumers through partnerships and pairings
- Built a prototype across 6+ screens to demonstrate end-to-end user journey and post-purchase engagement (Claude Code, Canva)

ACCENTURE New York, NY
Management Consultant (November 2022- January 2025) 2022-2025

- Led current-state documentation and maturity assessment for a global treasury operating model at a Fortune 50 technology company, making strategic recommendations that supported $1.2M in projected annual savings
- Developed a business case for AI-driven forecasting at a Fortune 150 foodservice client, projected 15% accuracy improvement, 10% idle cash reduction, and enhanced liquidity planning, influencing product investment decisions
- Advised a Fortune 100 manufacturer on a global technology strategy; led product selection across 16 criteria including AI capabilities, securing executive and cross-functional stakeholder alignment, and winning $2M+ subsequent implementation work
- Partnered with executive and technical teams to execute a large-scale global digital transformation for a Fortune 100 mining company via TMS implementation, enhancing visibility across 75+ accounts and cutting manual effort by 40%
- Analyzed banking and payments data in Excel during Kyriba implementation, reconciling discrepancies to improve cash reporting
- Built scalable GTM enablement assets for Accenture's Treasury and Risk solutions and supported performance tracking against revenue and pipeline targets, accelerating sales cycles and contributing to 3 new clients and $5M+ pipeline growth

KPMG New York , NY
Senior Associate (October 2021- November 2022) 2019-2022

- Led a cross-functional team designing a $676M federal relief program strategy, incorporating quantitative analysis and actuarial-informed assumptions to define eligibility criteria, forecast funding needs, and establish measurable success metrics for U.S. Treasury approval
- Drove a process transformation initiative to bring automation to a premier government client by identifying business requirements, conducting user acceptance testing, and gathering data requirements; this initiative ended up saving the client $3 million a year
- Served as PMO lead for State of Florida engagements, driving cross-functional alignment and managing timelines and dependencies to ensure on-time delivery across multiple workstreams

Associate (October 2019- October 2021) - *Received highest annual performance rating in 2020 and 2021*

- Conducted a current and target state analysis to address low engagement in an underperforming government program; implemented process enhancements and launched a stakeholder adoption campaign; resulted in a 3x increase in program participation
- Increased project profitability by 20% per resource hour by deploying 65 onshore managed service resources and specialized contractors across 9 projects; developed PowerBI dashboards to track performance metrics and report progress to leadership

SELECTED AI PROJECTS

AI CHIEF OF STAFF FOR STUDENTS - KAISEY
Anthropic x CBS x NYU Claude Hackathon – Team of 4 (April 2026)

- Co-built an AI-powered student life manager integrating Claude, Linkup, Google Calendar, and the Oura API to help students manage recruiting, academics, social, and fitness; built using Claude Code

AI GOVERNANCE IN AI SHOPPING AGENTS – CONSUMER REPORTS (NONPROFIT ORGANIZATION)
Research Project – Digital Marketplaces Apprenticeship, Selective Program (April 2026)

- Researched trust, transparency, and sponsored AI recommendations in agent-mediated commerce, analyzing how AI-generated product recommendations shape consumer perception; developed governance insights on disclosure standards and built a tradeoff simulation model
